Safer Buildings Coalition
950 SE Oak Ave
Roseburg, OR 97470

Mr. Foley,

Stellar Communications was recently hired to engineer and install a Public Safety in-building communications system in the newly remodeled international terminal at the Fort Lauderdale Airport. Our deadlines were extremely tight and when we encountered delays caused by AHJ interpretation of the code, we had no expectation that we would meet a very time-sensitive deadline.

With your assistance in providing key information and code references, we were not only able to keep our original completion date, but we were able to finish ahead of schedule. The ability to finish ahead of schedule will produce an estimated 3.2 million dollars in extra revenue for the airport while providing First Responders with a vital communications system in the event of an emergency. Stellar Communications, Broward County Aviation Department and Broward Fire Rescue are in your debt!

It is my distinct pleasure to recommend the Safer Buildings Coalition to all Public Safety Integrators, General Contractors, Building Owners, and local Authorities Having Jurisdiction. Their deep knowledge base and quick response time provides an unbiased third-party conduit for all facets of the Public Safety support system, which is critically needed.

Sincerely,

Derek E Schmiedl
Vice President of Engineering, Stellar Communications Group, Inc
